Project Manager - MEP Projects

This is a full-time, client-facing leadership role for a Project Manager - MEP Projects at DeBrine Associates in the San Francisco Bay Area. The Project Manager will lead the planning, coordination, and execution of complex mechanical, electrical, plumbing, and mission-critical infrastructure projects within occupied corporate campuses, technical facilities, research environments, and advanced manufacturing spaces.

Key Responsibilities

• Lead construction execution for complex MEP, infrastructure, and facility improvement projects.

• Serve as the primary on-site representative for project planning, construction activities, and contractor coordination.

• Oversee all phases of construction from preconstruction planning through project closeout.

• Coordinate with clients, facility operations teams, design consultants, contractors, and vendors.

• Manage MEP system installations, upgrades, commissioning, and turnover activities.

Qualifications

• Bachelor's degree in engineering or construction management.

• 10+ years of construction management experience.

• Significant real-world experience managing MEP infrastructure and facility projects.

• Strong practical understanding of mechanical, electrical, plumbing, controls, and building systems.

Compensation: $160k - $190k annually plus a generous benefits package. Compensation offered may vary based upon work location, experience, qualifications, and market considerations.
